RAMISETTY DIVYA SREE

Bengaluru, India | 8309779118 | divyasreeramisetty5a@gmail.com

PROFESSIONAL SUMMARY

Entry-level Artificial Intelligence and Machine Learning candidate with a Computer Science and Artificial Intelligence background and hands-on project experience building a public transport delay prediction application. Familiar with Python basics, data preprocessing, feature engineering, scikit-learn, Random Forest regression, and serving model predictions through FastAPI. Also brings foundational knowledge of Java, SQL, REST APIs, and full-stack development. Seeking a fresher AI/ML role to contribute to practical machine-learning projects and continue developing model-building and evaluation skills.

TECHNICAL SKILLS

AI / Machine Learning	Machine-learning fundamentals, data preprocessing, feature engineering, model training, Random Forest Regressor
Programming	Python (Basics), Java, JavaScript
Libraries / Frameworks	scikit-learn, FastAPI, React.js, Spring Boot
Data / APIs	SQL, MongoDB, Oracle, RESTful APIs
Tools	Maven, Swagger
CS Fundamentals	Object-oriented programming, collections, exception handling, multithreading

MACHINE LEARNING PROJECT

Public Transport Delay Prediction System | Python, scikit-learn, FastAPI, React.js

- Developed a full-stack application that predicts public transport delays using a Random Forest Regressor.
- Built FastAPI endpoints to serve model predictions to an interactive React dashboard.
- Applied data preprocessing, feature engineering, and model training; explored delay factors such as weather, routes, and time.
- Project notes report approximately 90% prediction accuracy; be prepared to explain the metric, test split, and evaluation method used.

ADDITIONAL TECHNICAL PROJECT

E-Commerce Backend Application | Java, Spring Boot, MongoDB, REST APIs, Swagger

- Built backend modules for authentication, product management, shopping cart, and order processing.
- Designed REST endpoints with input validation and structured responses, connected MongoDB for persistence, and used Swagger to document and test APIs.

FREELANCE EXPERIENCE

Freelance Software Developer | Independent Work

- Worked on small web application improvements and website features based on defined requirements.
- Implemented responsive UI components and connected frontend screens to backend APIs where applicable.
- Debugged issues, tested key user flows, and refined implementations based on feedback.

EDUCATION

B.Tech, Computer Science and Artificial Intelligence — Sri Venkateswara College of Engineering and Technology, Chittoor | April 2026 | CGPA: 8.82

Intermediate — Narayana Junior College, Tirupati | 2022 | 92.9%

CERTIFICATIONS & ACTIVITIES

Full Stack Foundation with Core Java Specialization — L&T EduTech; participated in technical workshops focused on Java programming and Artificial Intelligence. Interests: Badminton, Dance.
